ACADEMIC PROJECT

2022 - 2023

Project Title: DETECTION OF FAKE ONLINE REVIEWS USING SEMISUPERVISED AND SUPERVISED LEARNING

Description: The project used both supervised and semi supervised learning methods to analyse review data and detect fraudulent or fake reviews. Our solution helps both customers and product sellers by identifying fake reviews, which improves trust and authenticity on e-commerce platforms. We also incorporated sentiment analysis to make the interaction with users more dynamic and insightful.
